## OBJECTIVES

---

An undergraduate student seeking a role in technology to apply skills in cloud computing, data analytics, machine learning, software development, and automation. Focused on organizing, analyzing, and visualizing data, as well as developing efficient solutions to support informed decision-making and improve overall performance.

## TECHNICAL SKILLS

---

**Cloud Computing:** AWS (S3, SES, DynamoDB, Lambda).

**Programming:** Python, Java, and Django for web applications.

**AI & ML:** NLP, Text Classification, and Sentiment Analysis.

**Web Development:** Expertise in APIs and microservices.

**Data Annotation:** Image and video labeling for machine learning models.

**Databases:** SQL (PostgreSQL, MySQL, SQLite3) and NoSQL (MongoDB, DynamoDB, Firebase) database.

**Development Tools:** Foundational experience using Visual Studio Code, NetBeans, Google Colab, Android Studio and Figma.

**Data Visualization:** Proficiency in tools like Matplotlib and Seaborn for visualizing insights.

**Data Processing:** Experience in cleaning, transforming, and analyzing large datasets.

**Scripting:** Python, Bash

## EDUCATION

---

**Bachelor of Science in Computer Science**  
*Technological Institute of the Philippines*

**2021 - Present**  
*Quiapo, Manila*

## EXPERIENCE

---

**Virtual Assistant**  
*ClientAquisition.io*

**Jan 2023 - July 2023**  
*Remote*

- Virtual Assistant at ClientAquisition.io, supporting client acquisition through Instagram lead generation, social media content creation, and administrative tasks like email management, scheduling, and research.

**Image and Video Annotator**  
*Remotasks.com*

**Dec 2020 - Nov 2021**  
*Remote*

- Remotasks tasker specializing in labeling images and video frames for AI models like automated cars. Ensured data quality through thorough reviews, met deadlines, and adapted to project needs to support machine learning and computer vision applications.

## PROJECTS

---

**BingBong AI**

**July 2024**

- Developed an NLP-powered chatbot utilizing text classification and sentiment analysis.

**Journify**

**July 2024**

- Created an itinerary planner application allowing users to organize travel plans, add destinations, and schedule activities.

**Cloud Capture**

**May 2024**

- Leveraged AWS services (S3, SES, DynamoDB, Lambda) to automate photo editing and simplify photo-sharing.

**Automated Email**

**May 2024**

- Created a tool using PyAutoGUI to detect and audibly announce new emails, allowing voice-to-text responses.

**Livro**

**Nov 2023**

- Built a full-stack platform enabling writers to upload/manage eBooks and readers to interact with them through ratings and comments

## LEADERSHIP EXPERIENCE & ACTIVITIES

---

### Chief Marketing Officer

Jan 2024 - Present

*AWS Cloud Club TIP - Manila*

*Quiapo, Manila*

- Developed and executed marketing strategies that increased brand visibility, engagement, and community involvement through events, partnerships, and digital campaigns.
